

MCLACHLAN HOMES

Your experience, in your words.

2021 Master Builders Entrant

Planning to build our first house was a daunting experience, even more so by it being a custom build. However, it was an amazing journey and our end to experience with McLachlan Homes was outstanding.

McLachlan Homes insightful inputs into our custom design and their consultation during both the planning and build process was a standout; and we actually felt like we were part of the team in the design & build process towards our shared vision.

Coordinating the customisations, changes and selections was the ever patient Sophie, whose attention to detail and timeliness was outstanding, she kept us up to date and on track throughout the process. She is an amazing project coordinator!

McLachlan Homes suppliers deserve a mention too; McLachlan's standards and service are certainly embraced by those who they use. From the cabinetry & kitchen design process to tile selections, through to the trades onsite. Friendly, informative and patient, they cemented the entire process together seamlessly.

On site our experience with Nick and the team, during the peak of the Covid-19 pandemic was phenomenal. The coordination and their craftsmanship was amazing, with our own building inspector being highly complementary on the quality job of the build, as well as our developer (who used to be a builder and happens to be our neighbour too!).

Thanks again to Brad and the whole McLachlan team! The end result was exactly what we were striving for and we take comfort that we will be living in a quality home for many years to come.

Daryl & Bronwyn
